Bank and Trust Company Stocks 918
Foreign Bonds 927

INTRODUCTION

This publication gives the values at which bonds and stocks owned by insurance companies and societies should be carried in those companies' and societies' statements as of December 31, 1931.

The values in this book were prepared in accordance with the following resolutions adopted by the Committee on Valuation of Securities which were submitted to and confirmed by the National Convention of Insurance Commissioners on December 9, 1931:

> WHEREAS, exceptional fluctuations of value of stocks and bonds as reflected on the exchanges have led to the inquiry as to whether the market price quotations for stocks and bonds on any particular day are indicative of the fair market value of such securities; and
>
> WHEREAS, under similar circumstances it has been the policy of the National Convention of Insurance Commissioners to indorse and recommend the substitution of the range of the market and the average of prices thus found running through a reasonable period of time as a fair basis of market value of stocks and bonds:
>
> RESOLVED, that the Committee on Valuation of Securities of the National Convention of Insurance Commissioners is of the opinion that under present conditions the market quotations on stocks and bonds for a particular day are not a fair standard for the ascertainment of fair market value of such securities and recommends as a present substitute therefor the average price of stocks and bonds as reflected by the exchanges for a range of five quarterly periods ending September 30th, 1931.
>
> FURTHER RESOLVED, that since the fair average thus ascertained is approximately the closing price of securities on June 30th, 1931, the prices of June 30th, 1931 be taken as the fair market value during the current year and that such standard be accepted for the annual statements due as of December 31st, 1931, except that securities should not be valued at more than the purchase price if purchased since June 30th, 1931.
>
> FURTHER RESOLVED, that in cases where the condition of companies may require the immediate disposition of securities at present prices it is the opinion of this Committee that the discretion of a Commissioner of Insurance should be exercised to vary the general formula herein set forth so as to adopt the prices then reflected by the exchanges.
>
> FURTHER RESOLVED, that in the valuation of bonds which have defaulted in principal or interest since June 30th, 1931, and in the valuation of stocks and bonds of corporations in receivership since June 30th, 1931, the convention value shall be the exchange quotations of December 31st, 1931, instead of the average value as provided in the principal resolution.

The Committee on Valuation of Securities of the National Convention of Insurance Commissioners contracted with Poor's Publishing Company, 33 Broadway, New York, to do all the valuation work, subject to the supervision and approval of the Chairman on behalf of the Committee, and to print and distribute the book.

The general procedure in making the valuations has been as follows: A card file is continually kept up to date containing full particulars regarding each bond or stock and the name of each insurance company or society owning it or holding it as security for a loan. The valuations for bonds and stocks which are not quoted on any of the regular Stock Exchanges or the leading daily papers or financial periodicals have been determined from replies received to letters of inquiry sent by Poor's Publishing Company, over the signature of the Superintendent of Insurance of the State of New York, to bond and stock brokers and bankers, who are familiar with the particular securities.

The values of the securities of foreign countries not active on the regular stock exchanges of the United States have been determined by quotations on the various foreign stock exchanges.

The values of all bonds, except bonds in default are given *not including accrued interest* in accordance with the requirements of the uniform statement blank adopted by the National Convention of Insurance Commissioners. Bonds and stocks which have been called for redemption early in 1932 at fractional prices are carried in this book at those prices. All other bonds are carried at the nearest dollar per cent values. Bonds in default as to principal or interest, also Common and Preferred stocks, have been valued on a flat basis—that is, past due and accrued interest on such bonds and *dividends accrued or declared on stocks* are included in the market values. Dividends accrued or declared should not be reported separately as such in an insurance company's annual statement, except in the case of declared and unpaid dividends on stocks which have been sold ex-dividend by the insurance company prior to December 31st. The values of stocks in this book are per share *not per cent.*

Where the quoted prices on securities quoted only at long intervals seemed merely nominal, the figures were adjusted as the facts appeared to warrant. Where there had been no sales or bids it was necessary to depend upon rates of dividends or interest paid, the book value of the securities, the subscription price and in general the financial condition of the issuing corporation and the rates for similar securities.

The values were finally determined and entered on the cards by experts in Poor's Publishing Company's employ. Copy for the printer was prepared from the cards by employees of the company in its New York City office and sent to its printing plant.

Attention is called to the arrangement of the state, county and municipal bonds. Prior to 1929 these bonds had been in regular alphabetical order without regard to the state in which the county or city is located. In this book the county, municipal, etc., bonds of each state are grouped in alphabetical order under the heading of that state.

Under the alphabetical arrangement adopted, each security appears under the name of the corporation actually issuing the same, even though such corporation may be controlled by another. To illustrate: West Shore 4's of 2361 appear under West Shore Railroad, and not under New York Central Railroad, the controlling corporation; Transcontinental Short Line First 4's of 1958 appear under the name of the issuing corporation, viz., the Atchison, Topeka and Santa Fe Railway.

The valuation cards used for the securities listed in this book will serve for another seven years for the securities owned or loaned on at the end of 1931, but it will be necessary for new cards to be written for the securities acquired after that date and to eliminate old cards covering securities no longer owned. It is important for each insurance company and society to send to Poor's Publishing Company, at the *end* of each of the first three quarters of this year, and at the *end* of each of the other three months of the year schedules with full descriptions of the bonds and stocks acquired and disposed of during that period. Photographic schedules must be on white paper, the letters and figures black and no smaller than elite.

ABBREVIATIONS. Many words have been omitted from and many abbreviated in the descriptions and many serial bonds, issued by the same city or company and bearing the same rate of interest, have been merged in this book in order to expedite the writing of copy for the printer and the typesetting. It is important, however, for insurance companies and societies to continue giving the full names and locations of the issuing cities or companies with the full description of each security, the year and rate of option of the first year of redemption, and to report separately the different serial issues of the same city or company, although bearing the same rate of interest, in order that full information can be entered on the valuation cards. The necessity of giving the year and rate of the first year of redemption arises from the fact that many bonds are quoted on a yield basis which has to be applied to the first year of redemption. The merging in this book of serials issued by the same city or company was possible this year as many of them have the same value. Another year many similar mergers may be impossible. In some cases the words County, Company, Corporation, Consolidated, Convertible, etc., have been abbreviated in this book but abbreviations should *not* be used in the company's schedules. A list of the abbreviations used in this book will be found on page VIII.

The committee wishes to caution the general public against the use of this book as a guide for investors, or for the purpose of assisting in the sale or disposal of any securities. Its use by any brokerage firm or security salesman in a prospectus or otherwise, to assist in the sale of any security, will be unauthorized and improper. Its sole purpose is to facilitate the valuation of stocks and bonds held by insurance companies on a fair and uniform basis, and to that purpose it is believed by the committee to be well adapted. The fact that a certain bond or stock is included in this list does not signify that it is a legal investment for insurance companies under the laws of all states or of any particular state.

GEORGE S. VAN SCHAICK, CHAIRMAN,
Committee on Valuation of Securities, National
Convention of Insurance Commissioners.
